

SEASONAL SPEED AND WEIGHT RESTRICTIONS

Seasonal speed and weight restrictions reduce normal truckloads by 35% and the speed to 35 MPH, depending on truck size and axle spacing. The 35 MPH speed restriction also applies to empty trucks if they weigh over 10,000 lbs.

County roads will be patrolled by certified weigh masters, and those violating the restrictions will be subject to fines. Special permits for designated routes during frost laws will be required. Gravel roads are not subject to Frost Laws.
